*dev &
design*

OBJECTIVE

To gain new exposure to the Internet development industry while furthering my knowledge and skills in useful and cutting-edge web technologies. To work with both design and development teams to architect innovative and creative web applications.

EXPERIENCE

Server-Side Programming

ASP 3.0
XML and XSL templates
Com and COM+
JSP
PHP

Client-Side Programming

JavaScript
CSS
Cross-Browser DHTML
VBScript

Database Development

SQL Server
Oracle 8i
Access
Erwin & Visio data modeling

Design and Multimedia

Flash 5
- Advanced ActionScripting
- Performance Optimization
Photoshop 6
Freehand 10
Streaming Media

Other Languages

Java (OOP)
C/C++ (OOP, MFC)
Visual Basic
Cobol
Fortran

EXPERIENCE SUMMARY

Design/Development Experience

Led development and db design for 2-6 person teams
Architected both ASP and Flash based applications
Authored varying specification documents
Led design and usability decisions
Provided design reviews and usability testing
Instructed teams in techniques and technologies
Knowledgeable in design tools and processes

Management Experience

Personnel management decisions
Interviewed developers and project managers
Managed workload distribution and scope
Worked directly with clients
Led development and project requirement meetings
Coordinated design and dev. on many projects
Managed the deployment (and updates) of projects

EDUCATION

BA in Computer Science (Seattle Pacific University)
Minor in Business Administration (Seattle Pacific University)

EMPLOYMENT HISTORY

Lead Web Developer [1.5 yrs - current]

At Paperless Business I am currently working with and leading teams to estimate and implement varying web projects and web applications spanning many technologies and environments. Projects I have been a part of include:

Led the development and assisted with the design of an online game component for a prominent board game company's newly developed trivia product.

Led development and design of an online restaurateur-vendor inventory management and ordering system.

Led the development of a CMS system requiring the dynamic translation of XML content to HTML.

Participated on a team to create specifications and develop a purchase requisition system that required an interface with an accounting database (Platinum), email notifications and multiple levels of authorization.

Worked with a small development team to build an accounts receivable front end to an existing Oracle based accounting system for a Seattle-based dot-com company.

Lead Developer [2.5 yrs - current]

Owner and Lead Developer of 12 Ounce Web Studio. Duties include project management, corporate branding, scheduling and estimation as well as system design and implementation. Client interaction and consultation have been my primary focus in bringing small-business projects to the web.

Led the development and design of a small website for a Seattle-based travel agency: <http://www.shicari.com>

Led the development and design of a small website for a Seattle-based salon: <http://www.salonjoseph.com>

Computer Technician and Programmer [1.5 yrs]

Hardware Repair, Software and System Troubleshooting, and Online Database Design and Implementation for the Domain Group, an advertising agency.
